STRETCH TENT SIZE CHART

We do recommend to purchase tents in sizes that make modularity possible. This allows you to join tents perfectly each time.

The following is an example of 3 modular sizes that work together:

- ✓ 10.5 x 7.5
- ✓ 10,5 x 15
- ✓ 21 x 15

These 3 sizes can easily be joined together to give your company more flexibility in the range of sizes that you can cover without having to buy a tent for every size. Optional gutter can be purchased with the tents so ensure a waterproof join.

Alternatively any size of tent can be custom manufactured to suit your needs.
